- ➔ **Germany:** Andreas LANGSDORF - Andreas.Langsdorf@gfe.de - +49 (162) 901 60 64
- ➔ **Luxembourg:** Anthony AUERT - anthony.auert@luxinnovation.lu - +352 621 985 163
- ➔ **Wallonia:** Cendrine MARCHAL - cendrine.marchal@technifutur.be - + 32(0)496 99 59 01

After confirming your request, you will receive a link to participate to the webinar.

ABOUT GROS GROUP

Established in April 2019 in France, GROB France is the French subsidiary of GROB Werke GmbH & Co KG, a German family company founded in 1926. As a leading supplier of the automotive industry, GROB Group is present worldwide and supports its customers with state-of-the-art competence and technology. We are project developers, suppliers of production facilities and providers of fully automated production lines.

Our 5-axis machining centers with horizontal spindle, single-spindle and dual-spindle, also meet the needs of other sectors, such as aeronautics, machine building, tool and mold making, medical, and hydraulics, for the machining of small, medium and large series.

We complete our range with 4 axis machining centers with horizontal spindle. We also offer the automation of our machining centers with a pallet changer, pallet magazines, robotized cells and tool magazine extensions.

GROB Electromobility: A comprehensive understanding of the "electric vehicle" system is essential in order to provide the right system technology for large-scale production and process reliability. We supply complete lines in the "E-Mobility" sector for the production of electric motors, battery assembly lines and automated solutions for the machining of large pieces.
